

# Hyperion Enterprise

## World-class financial consolidation, reporting and analysis with minimal IT support

Hyperion Enterprise, part of Hyperion's world-class family of Business Performance Management applications.

Meets legal consolidation requirements of global businesses on a country-by-country basis

Delivers mission-critical management reporting and analysis

Provides high ease of use and straightforward reporting capabilities

Offers a choice of centralized or distributed deployment options

Supplies a rich set of pre-packaged features and requires limited IT support

**Hyperion Enterprise** is a proven packaged application that improves departmental financial consolidation and reporting efficiency by streamlining the collection, consolidation and reporting of financial results in a global environment. This frees financial managers from spreadsheets and general ledgers, enabling them to reduce the financial close cycle and improve the quality of financial information.

**Hyperion Enterprise** can be distributed and installed at remote offices quickly and easily. It can be fully deployed by the finance organization with minimal IT support—even on a standalone PC. Hyperion Enterprise offers unparalleled ease of use and enables end users to get up and running quickly with minimum training. Hyperion Enterprise is the world's most popular financial consolidation, reporting and analysis solution.

### Key Features:

- **Unmatched ease of use.** Deployable by the finance organization with limited IT involvement, Hyperion Enterprise software's graphical user interface makes it simple to install and to learn. Hyperion Enterprise leverages familiar desktop tools like Microsoft Excel and standard Web browsers.
- **Advanced change-management support.** Hyperion Enterprise can quickly adapt to reorganizations, mergers, acquisitions and divestitures. Its ability to track changing organization structures over time allows financial managers to monitor the effects of these reorganizations and then model future changes with ease.
- **Global support.** Hyperion Enterprise scales to meet the needs of even the largest enterprises. Allowing companies to handle legal, statutory and tax reporting requirements with ease, Hyperion Enterprise also provides the information required for management reporting purposes. This allows you to implement a single solution on a global basis in up to seven languages.
- **Flexible deployment.** Hyperion Enterprise can be deployed on a distributed or a centralized basis. Offices can have their own copy or applications can be centralized at headquarters via the Web or existing wide area networks.
- **Integration with ERP, other data sources and the Hyperion BI Platform.** Hyperion Enterprise software's functionality can be extended through integration with ERP and other third-party applications using Hyperion Application Link. In addition, many organizations also use Hyperion Enterprise in conjunction with Hyperion Essbase so that data can be accessed by the most extensive, enterprise-class Business Intelligence tools in the market today—all offered by Hyperion and its partners.
